The software I've downloaded for the task;

OBS Studio--Screen Recording software

EpicPen--Screen marking tool, for basic visual annotations of the text

Audacity--Audio recording, although OBS Studio has a native audio client that I'll try first.

And an idea I had for flavor art;

(The yellow ribbon is a watermark of sorts; I would have to actually pay for the photo editor or find an alternative to do it properly. BeFunky is the name that popped up in case anyone wants to play around with it)
