

# **To What Extent, If Any, Does Modern Physics Invalidate Epicurean Philosophy?**

**Post by “A\_Gardner” of August 15, 2020 at 8:54 AM**

I do have some thoughts on this [Cassius](#) , but before sharing, are we discussing modern science in general (including psychology) or is the focus on modern physics and what we currently understand (as it seems to be in your initial post)?

I ask because I believe that Epicurean teachings on physics are more reconcilable and face less challenges with the former, rather than the latter.
