

To What Extent, If Any, Does Modern Physics Invalidate Epicurean Philosophy?

Post by “Cassius” of August 15, 2020 at 9:55 PM

Cassius:

As Ilkka said upstream, the physics is based in large part on epistemology, and Epicurus' epistemology is a rejection of Platonic and Aristotelian rationalism, so we are now in a discussion of even greater significance than the astrophysics we were discussing earlier.
