Actually, that does help. I don't know if it resolves all my uneasiness (assuages all my pain?), but I think it certainly begins to address it.

So, that's why they Canon is three-legged. We need **all three** aspects: pain/pleasure, sensations, prolepses - working together, not one alone. I think this is why it came as such a shock (pleasant shock) that [PD24](#) specifically cited the three aspects of the Canon in the original Greek. You need all three.
