

Responding To A Video Entitled: "Quantum Physics Debunks Materialism" - Collecting Arguments Against Anti-Epicurean Uses of Quantum Physics Theories

Post by "Godfrey" of October 4, 2020 at 4:29 PM

Thanks Susan! Of course I'm not as smart as Penrose 😊 but to me, infinitely small is different from infinite in extent. One Epicurean argument is against infinite divisibility of atoms, but I'm not even sure if this is addressing that argument. Another Epicurean argument is that the universe is infinite in extent, but it doesn't seem like he's addressing that argument. He mentions infinities of different sizes, but again I think that applies to number but not extent (?).

I started watching that video but got interrupted; I'll have to get back to it at some point and try to catch his argument if I can.
