[Quote from Elayne](#)

Setting anything other than the feeling of pleasure as the measure of greatness means you have got virtue ethics mixed up in there.

That's another way of saying the same thing that seems to important to stress. The "definition" of pleasure that is current today is far too narrow, and because we play the game with the public definition of "pleasure" being so narrow, it is hard even to communicate the full extent of Epicurean theory until that is made clear.
