

Making Epicurean Canonics Understandable

Post by “Don” of November 1, 2020 at 12:54 AM

Have you seen Sedley's paper on Epicurus's On Nature, Book 28? it includes commentary and translation from the Herculaneum scroll. I downloaded it from Academia. Not finished reading yet, but it has some very interesting parts about prolepses, epibolē, eidola (images), memory, and more. Directly relevant to the current conversation!
