

Video: The Vatican List Of The Sayings Of Epicurus

This is the first ready-for-use production of a video using Kyle's script. It still uses the computer voice, which is not ideal, but it provides a better version of the Vatican List of Sayings than was previously available. Hopefully we will get volunteers to record human-spoken versions of this text, and we can generate new editions with all sorts of audio and graphic refinements. But for the moment, he is "The Vatican List of the Sayings of Epicurus."
