

Technical Glitch With Picture Posting Being Addressed

Post by “Cassius” of January 24, 2024 at 6:55 AM

If you (like me) have run into a problem with linking pictures in a post since the upgrade, please be aware that I have contacted the software developers and they tell me this is a known issue that they are working to address soon. Most of the time it seems to work, but sometimes pictures just refuse to "stick" in a post. If you run into that don't worry that it is your fault - should be fixed soon.

Thank you for all you do to keep our little virtual Garden up and running! It is sincerely appreciated.
