

Forum Reorganization: Questions Of "Attitudes Toward Divinity" Splitting From "Existence and Nature of Gods"

Post by "Cassius" of March 23, 2024 at 11:46 AM

These two questions about the gods are closely related, but we've already had a lot of discussion on them, and that will continue into the future. So from here on out, to the extent that people start new threads focusing on one aspect or the other, let's divide the posts this way:

1 - Questions regarding whether the gods exist, and their nature, and how we know about them, to this subsection of the "Physics" forum:

[Nature Has No Gods Over Her - The Nature And Existence of Gods](#)

2 - Questions regarding Epicurus' ethical advice as to how to think about the gods, and our attitude toward them, including questions of "religion," to this section of the "Ethics" forum:

[The Proper Attitude Toward Divinity - Piety and "Religion"](#)

I have already done some sorting of existing threads into the two divisions, and if other administrators see obvious candidates for switching threads between them, please do.

There's no doubt that threads in each section will blur into the other aspect, so we'll have cross-links from one forum to the other in the forum description. But at people will be looking for discussions of both issues in both contexts, so hopefully this will help.
