

Modern Online Public Domain Expanded Usener Collection

Post by “Cassius” of March 24, 2024 at 5:57 AM

This is a thread for discussing what is available in terms of a Modern Online Public Domain Expanded version of Usener's collection of Epicurean fragments.

Is anyone aware of any individual or institutional efforts to create such a resource?

If not, how could such a project be started to allow maximum ease of contributions and maximum public domain status so as to allow others to expand and modify it?
