

# 'Philosophos' web site - philosophical connections

**Post by "TauPhi" of June 11, 2025 at 5:02 PM**

[PhiloSophos: Philosophical Connections by Dr Anthony Harrison-Barbet](#)

A great resource for anyone interested in Western Philosophy. It contains interlinked profiles of 126 philosophers with 'connections' at the end of each profile. And these connections are the real gems of this web site. They show philosophers' influences, which ideas they shared, which ideas they opposed and which ideas they modified. It's a very clear way to see the development and interconnectedness of Western philosophy.

Please read 'How to use the profiles' section first to understand the whole concept and its execution.
