Hiram so this is an audio interview? What's the date of this? Is there a working link to the podcast?

I believe you need to have itunes installed on windows, mac os or the apple music app on android to be able to listen to it. Anything as far as I know whether it is free or not apple encrypted their audio files so you can only use it with their software. As of this writing there is software to get around this encryption but you have to pay for it. I just tried accessing the podcast via apple music on android and it doesn't work.

Thanks for looking godek. I think this was out there some time ago so maybe if Hiram has a copy he can post in on his page.
